○ ACHIEVEMENTS

With a strong foundation in web development, competitive programming, and AI/ML, I have built and deployed multiple real-world projects that combine technical depth with practical usability. My journey reflects consistent growth through solving complex problems, contributing to innovative solutions, and actively participating in hackathons and coding platforms.

Web Dev
- Built many full stack apps like GetMeAChai, payment wallet app, Live chat & vc app within first year solo.
- Team Leader in DevX projects group of Devx community.

Coding Skills
- Solved 370+ DSA problems on LeetCode, strengthening logic and algorithms.
- 2 ⭐ at codechef reflecting profiency in competitive programming

AI/ML & Cloud Exposure
- Coimpleted Deep Learning and Neural networks and CNN models in starting of second year.
- Built many models using CNN like Age-Gender prediction, Dog-Cat classifier and more
- Participated in many hackathons

Initiative & Leadership
- Independently learned and built multiple projects outside academics.
- Actively guide batchmates in coding/web development.

AGENDAS

Revive & Rebuild the Club

- Restart DevC with regular meetups & activities
- Create a friendly, open culture for collaboration
- Make the club active and engaging again

Project-Based Learning & Guidance

- Sessions on HTML, CSS, JS, MERN, Next.js
- Form teams and assign real-world projects
- Teach Git/GitHub, teamwork & project management

Open Source & Growth

- Guide members in open-source contributions
- Introduce new tools like Tailwind, Figma, Cloud
- Organize workshops, hackathons & peer learning
- Build a DevC Club Website to showcase projects
